

# Resource Management

1. Study Figure 1 showing patterns of water scarcity globally

Outline what is meant by the term inequality.

(2 marks)

---

---

---

---

2. Explain how the UKs demand for all year round fruit and vegetables influences the sources of our food.

(4 marks)

---

---

---

---

---

---

---

---

3. What is organic food?

(2 marks)

---

---

---

---

7. Explain how agribusiness has changed the size of a typical UK farm.

(4 marks)

8. Study Figure 2 which shows possible sources of water pollution in the UK

Figure 2

With reference to Figure 2, explain how water could become polluted.

(4 marks)

16. Explain one way in which population growth can lead to increasing water consumption . (4 marks )

---

---

---

---

---

---

---

---

---

---

17. Outline what the term 'over-abstraction' means in relation to water supply. (2 marks)

---

---

---

---

18. Study Figure 3 showing impacts of water insecurity.

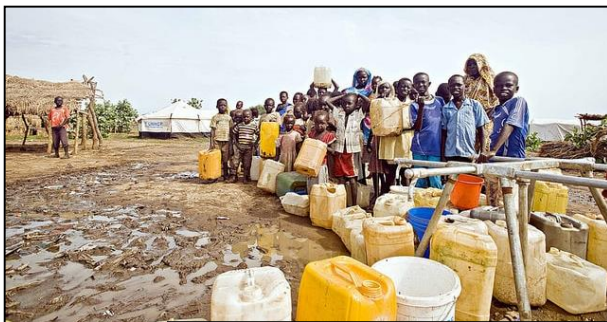

Figure 3

27. Outline **two** reasons why groundwater management helps create sustainable water supplies (4 marks)

Reason 1

---

---

---

---

Reason 2

---

---

---

---

28. With reference to an example, describe the benefits of using groundwater management to provide a sustainable supply of water. (4 marks)

---

---

---

---

---

---

---

---

---

---

29. What does the term 'water conservation' mean? (2 marks)

---

---

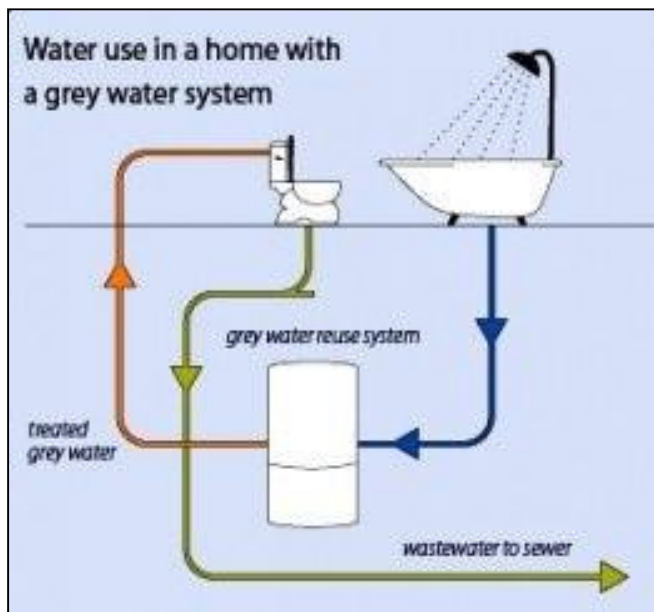

30. Outline what the term 'grey water' means (2 marks)

---

---

31. Study Figure 6 which shows a grey water system

Figure 6

With reference to Figure 6, explain why grey water is sustainable

(4 marks)

---

---

---

---

---

---

---

---

32. Which one of the following is the most accurate definition of water recycling?

(1 mark)

- a) Artificially adding water to reservoirs
- b) Reducing water consumption by using water more efficiently.
- c) Reusing water that has already been used by homes or businesses
- d) Using water without artificial chemicals.
